Bedrijfsbeschrijving

We're actively establishing ourselves as a significant player in the startup sector.

Our mission? To not only nurture our own SME ventures, but also empower others to flourish. Our focus is on turning innovative concepts into market-ready enterprises, while simultaneously expanding our diverse real estate portfolio.

Currently, we've already forged partnerships with six promising companies and have initiated the development of four SaaS software products tailored to startups and beyond.

Notably, two of these SaaS solutions are poised to be sold to the highest bidder.

This isn't just about one product or one company; it's about a collective of enterprises united in mutual support and delivering top-notch services to fellow SMEs.

Business Model

Our goal is to become a dominant force in the start-up business landscape by fostering and transforming emerging ventures into thriving entities. We will curate a diverse portfolio of corporate and private properties to strengthen our operations. Our organization provides an ideal platform to materialize the wealth of ideas we have gathered over the past five years.

Each idea will be meticulously transformed into a start-up, nurtured for remarkable success, and eventually sold to the most suitable bidder, encouraging the exploration of new ideas. This creates an ideal structure for other entrepreneurs to launch their start-ups through the company's services. We can provide software, marketing, sales, properties, vehicles and many more services.

USP's

Our first idea is a dating app where the main competition will be Tinder, in a dating market valued now at USD 9.65 billion and has a CAGR of 7+% per year. Our second idea has no competition in the app world. We also rebrand our existing business and bring it into the group not only our customers but also 4 major SaaS software packages.

Our entire structure is set up to provide every (start-up) company with all the tools it needs to succeed and grow. At the same time, is this structure set up so that the entire Group of companies becomes recession-proof and stable.
