

Artificial Intelligence Engine (Beyond Generative A.I.: Holistic Quantum Data Driven Human Inclusive Algorithms)

venturecapital.nl • <https://venturecapital.nl/artificial-intelligence-engine-beyond-generative-a-i-holistic-quantum-data-driven-human-inclusive-algorithms/>

Type Klant	B2B and B2C
Gewenst Type Investeerder	Angel Investor, Venture Capital, Private-Equity, Incubator-Accelerator, Strategic-Investor
Benodigd Kapitaal	€ 650.000,-
Reeds toegezegde financiering	€ 1.000.000,-
Minimale Ticketsize	€ 50.000,-
Sector	AI, B2B-Software, B2C-Software, SaaS, Security
Bedrijfsfase	Early-Growth

Land geregistreerd	Netherlands
Aantal Founders	1
Aantal Huidige Werknemers	0
Maandelijkse Omzet	€ 3.000,-
Omzet (prognose) komende 12 maanden	€ 120.000,-
Omzet (prognose) maand 13 - 24	€ 250.000,-
Huidige Kosten (maandelijks)	€ 1.500,-

Bedrijfsbeschrijving

- A.I. Based Cloud Services
- SaaS Application
- B2B & B2C Products

Products and services to contribute to achievements, business development, knowledge acquisition, productivity, creativity in diverse industries (see details below)

Creativity, analysis, cognitive, prediction, assessment, strategic management, communication, marketing, learning, coaching, health, design, human personal growth, purpose, wealth generation, work life balance, culture development, diversity, cocreativity, knowledge systematization, peace, multidisciplinary integration, multicultural integration, DNA studies, human potential, circular design, life cycles, immunology, brain performance enhancement, mathematics, research, emotional intelligence, empathy, cybersecurity, perception, big data analysis, systems thinking, design, community building, and much more

Business Model

BUSINESS MODEL

- Generation of A.I. Based Solutions or applications
- Subscriptions, memberships, pay as you go, pay data volume, pay complex analysis (algorithms)

Our digital platform on the cloud will provide these solutions to private and public organizations, research, and entrepreneurs

USP's

Generative A.I. brought acceleration to creativity, for media, text, and cognitive. Yet Generative A.I. is based on binary design. Human cognition, emotions, immune system are not binary. There for, generative A.I. will not represent real human creativity.

Holistic-Quantum Data Driven A.I. elements, algorithms, patterns, are closer to human cognitions, emotional intelligence, and consciousness.

KNOWLEDGE BASE

Holistic Quantum A.I. utilizes as a back end a quantum mathematics, based on organic (re) generative, growth and life sustaining principles. The algorithms behind are based on pure mathematics. Result of research studies since 1993, on nature inspired ancient cultures and civilizations, their math, architecture, vision, thinking, society, arts and culture. We are unique owners and researchers of this knowledge. It is not available anywhere else's in the market or academic research organizations. Our research institute has been testing and producing applications for which our Holistic QUantum A.I. or in its early format Holistic Quantum Data Driven Tools generate unique outcomes

HUMAN INCLUSIVE

Holistic Quantum A.I. is human inclusive. It means trained humans can use it, expanding their own cognitive, emotional, creative, conscious productivity, analysis, prediction.

As human competences have been matched with the outcome and processing used and generated by Holistic Quantum A.I. Which means that a parity synch between our A.I. and Data driven Tools will take place once the human operators have been trained

WHAT ISSUE WE ADDRESS WITH OUR A.I.?

Today regulations for A.I. will restrict the use of other forms of A.I due to the fact that those A.I. engines learn, create and produce outcomes without human supervision, or validation of the real facts, the emulated thinking may populate the internet and become a common belief or a knowledge reference, without having real facts, events behind. In other words the modern A.I. can very well invent knowledge.

Holistic Quantum Data-Driven A.I. which is Human Inclusive has that issue under control, as humans trained will always monitor and validate, and share data and outcome that "makes human sense".

APPLICATIONS

Creativity, analysis, cognitive, prediction, assessment, strategic management, communication, marketing, learning, coaching, health, design, human personal growth, purpose, wealth generation,

work life balance, culture development, diversity, cocreativity, knowledge systematization, peace, Multidisciplinary integration, multicultural integration, DNA studies, human potential, circular design, life cycles, immunology, brain performance enhancement, mathematics, research, emotional intelligence, empathy, cybersecurity, perception, big data analysis, systems thinking, design, community building, and much more

Investeringsbehoefte

INVESTMENT

- 250.000,00 EUR platform development
- 50.000,00 EUR new application or solution development
- 100.000,00 EUR marketing and branding
- 100.000,00 EUR school for operators, the first 100 operators
- 150.000,00 EUR yearly operations x3 years
- **TOTAL: 650.000,00 EUR**

RUNWAY: 3 years

Alternative Bootstrapping Strategies

- 1.) Upgrades of already developed applications, for 250.00,00 EUR 1 year runway
- 2.) Upgrade of one key application, 100.000,00 EUR runway 9 months
- 3.) Revamp of a data driven application, 50.000,00 EUR runway 3 months

Through the Bootstrapping strategies we can develop the business in slow motion. Though producing a simplified product that will generate income and profit to reinvest in the following upgrades

INVESTMENT

Previous investment by the founder: About in total 1 million EUR for research development, testing, applications creation and upgrades

Ervaring Founder(s)

STAGE OF DEVELOPMENT

We have tested these applications with an early stage application: Holistic Quantum Data-Driven Applications and analog tools.

Our next step will be to implement the A.I. cloud based platform, upgrade all the tools we have developed and used so far and provide a new level of services

We have already tested products with data driven applications that will be upgraded. We have done an agile assessment of market opportunities with 36 diverse applications, through entrepreneurial projects, learning which applications would be faster and more effective to be brought to market.

Previous investment by the founder: About in total 1 million EUR for research development, testing, applications creation and upgrades

The founder: independent researcher, innovators, studies of nature inspired mathematics, cultures, civilizations, their technology, architecture, arts, human education, health, food and social systems based on proto human computing and thinking tools. Discovered innovative mathematic system, algorithms, and data processing, with holistic quantum-mathematics (thinking) models, DNA generation algorithms, and notary (base 9) computing.

Lives in the Netherlands since 2017, holder of a residency permit as innovator, entrepreneur and investor.

Samenvatting

Datum: 25 September 2023
